## How mix of online & offline education can solve India's skill problem: Education expert Varun Gupta explains

ET Online • Last Updated Nov 23, 2022, 12:54 AM IST

**Synopsis**  
For developing a workforce that is prepared for employment, a combination of online learning strategies and offline learning sessions through practical training can solve India's skill problem, Varun Gupta, Founder of IMTS Noida said.

Online learning has proved to be a paradigm-shifting revolution in the field of education. It has not only improved the education and learning process during the Covid-19 period, but has also helped in introduction of numerous fresh concepts and inventions in the field. It has significantly improved the standard of education and has also helped in skills development in rural and isolated regions. Additionally, it has guaranteed that getting quality education is affordable, convenience and easier to access.

**BREAKING NEWS** Advantage of blended learning is that it offers "the best of both worlds" – that is, the advantages of online education combined with all the exposer of the traditional classrooms.
